

Claim 3. (Amended) A dry soil composition used in a stainproof test according to AATCC-123, shown in the following table:

<u>Composition</u>	<u>Content (% by weight)</u>
Peat moss	38.4
Cement	18
Kaoline	18
Silica	18
Carbon black	1.15
Iron oxide	0.3
Nujol	6.25.

Claim 6. (Amended) A stainproofing agent composition for carpet comprising:

- (1) a fluorine-containing stainproofing agent comprising a fluoroalkyl-containing compound; and
- (2) a triazine ring-containing crosslinking agent.

Claim 9. (Amended) The stainproofing agent composition for carpet according to claim 6 which further comprises at least one selected from the group consisting of PEG and a copolymer comprising:

- (1) at least one monomer selected from the group consisting of acrylate and methacrylate which have a polyoxyethylene chain; and
- (2) at least one reactive monomer selected from the group consisting of glycerol methacrylate and glycidyl methacrylate.

AB and SUB DA
Claim 10. (Amended) The carpet according to claim 1 treated with the stainproofing agent composition, which comprises:

- (1) a fluorine-containing stainproofing agent comprising a fluoroalkyl-containing compound and
 - (2) a triazine ring-containing crosslinking agent,
- and may further comprise at least one selected from the group

consisting of PEG and a copolymer comprising:

- (3) at least one monomer selected from the group consisting of acrylate and methacrylate which have a polyoxyethylene chain and
 - (4) at least one reactive monomer selected from the group consisting of glycerol methacrylate and glycidyl methacrylate.
-
